

I have enjoyed and supported KLOVE radio in my community for many years and have now found that the FCC is trying to take that away from the supporter of this music ministry by introducing a low power FM frequency which will take over the frequency we listen to KLOVE on. I am asking that you do whatever needs to be done in order to secure that the frequency we listen to KLOVE on in our community 88.9 remain the way that it is. I have donated my time and money to KLOVE for the past 5 years and want this type of music and ministry available to my community. Being in a small community on the Oregon Coast we do not have any other kind of Christian music available to us. Thank you for helping us keep KLOVE Radio on the air at 88.9 in Tillamook Oregon.
